

SMARTBEAR

Collaborator + SIMULINK®

A clearer, simpler way to review Simulink models.

### Ensure Consistency

Go beyond capturing Simulink feedback in disparate spreadsheets or documents. Upload and display Simulink models directly in Collaborator, add comments and defects, and highlight any differences as changes occur.

### Create Team Harmony

With team awareness across the globe, everyone is up to date on the latest changes. Whether or not a specific user has access to Simulink, anyone can review and comment on models straight away.

### Build a Reliable Audit Trail

Ensure that the right people are on the review and the right data is being captured. In the event of an audit, everything is in one place and easy to access.

## Accelerate development timelines with ease

*We definitely see the value of this capability and think that it will save us a significant amount of time when reviewing models.*

– Aerospace and Defense company

*For years now, we have been evaluating tools to support collaborative peer review of MATLAB Simulink files without much luck. With Collaborator's new Simulink module, we are excited to finally bring Simulink diagrams into our collaborative review process.*

– Michael Coury, Senior Engineering Manager, XALT Energy

## Industry Leaders Trust Collaborator

# A natural extension to your Simulink reviews

Collaborate and manage model reviews with your peers.

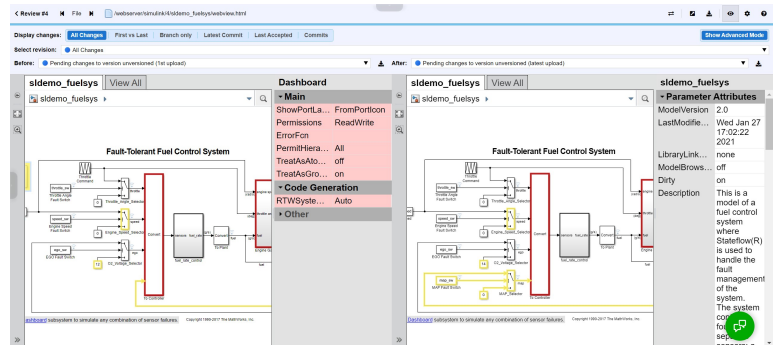

## Unify

Without a cohesive peer-review process, it can be tough to ensure models are fully reviewed and all issues addressed. With one tool, you get a consistent review across all your engineering artifacts: Simulink, code, Word, PowerPoint, Excel, Visio, Pdf, images, and more.

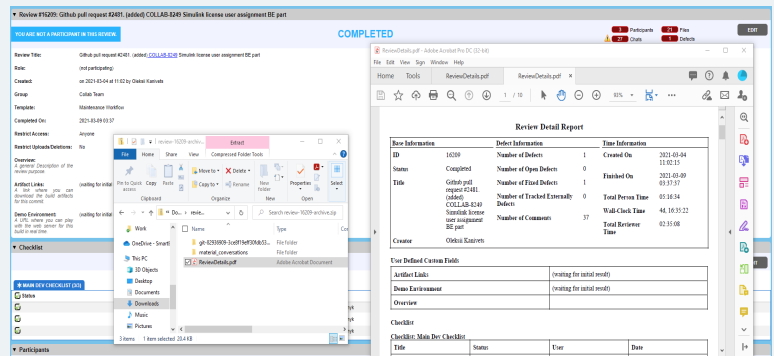

## Simplify

Simulink models can be extremely complex, with many layers. Simplify your model reviews with side-by-side reviews with different versions, create comments and defects on blocks and parameters, and @mention members of the team to spur conversations.

## Control

Improve audit response times and easily prove reviews for regulatory compliance. Auditor-level access makes sure the right people are reviewing, or you can create and share reports manually. Export old reviews for long-term storage.

## Simulink for Collaborator

Start your 30-day free trial for easy, efficient review of Simulink models.
